## BIODEGRADABLE HOT MELT ADHESIVE

**A new innovative, 100% biodegradable hot melt adhesive made of renewable materials.** The product is designed to replace conventional oil-based hot melt adhesives that are normally used in packaging applications and in the production of hygiene products.

### **Is the product completely biodegradable?**

- Yes, it is completely compostable according to ISO-14855 standard.
- Enables completely compostable packaging.

### **Where can I use the product?**

- Take-away food packaging
- Tissue-paper and fabric lamination applications
- Cardboard box and carton case forming and closing in markets with limited carton recycling possibilities

### **How does it work?**

- It can be used like a normal hot melt adhesive.
- It is suitable for both nozzle and roller application.
